Your donation will help 2,000 HIV patients in Wisconsin.
In the coming year 2,000 HIV patients will turn to ARCW for health care. Most of them live in poverty and have no health care coverage. Their ability to succeed with treatment depends on whether they have the basic necessities of life – food, housing, medications and quality health care.

You can help. Your donation will help assure that the basic needs of HIV patients are met and they have the best opportunity for treatment success.
The multi-disciplinary team of health care professionals at ARCW

- Serving 2,000 medical, dental and mental health patients in 2012
- 30% of ARCW patients live in poverty
- $47 million is needed to provide comprehensive health care

The integration of medical, dental and mental health services at the ARCW Medical Center meets all the health care needs of HIV patients giving them the best opportunity for treatment success.

ARCW Medical Center

ARCW Pharmacists provide medications and counseling for HIV patients

- Serving 1,500 HIV patients in 2012
- 250 prescriptions are dispensed daily
- $200,000 is needed for patients with no pharmacy coverage

The ARCW Pharmacy is the only HIV dedicated pharmacy in Wisconsin providing patients with the most advanced HIV medications and expert counseling on adherence and side effects.

ARCW Pharmacy

ARCW Food Pantry

Fresh, nutritious foods stock the ARCW Food Pantry

- Serving 1,600 people with HIV in 2012
- 425 tons of food provided
- $100,000 of purchased food is needed to help stock the pantries

The ARCW Food Pantry operates in seven Wisconsin cities specializing in nutritious foods that support HIV treatment plans. Home food deliveries are made for patients unable to travel.

ARCW Food Pantry

ARCW Housing

United Way Volunteers provide landscaping at ARCW housing facilities

- Serving 700 people with HIV in 2012
- 15,000 overnight stays at two ARCW housing facilities
- $650,000 in rent assistance is needed to sustain patient housing

The goal of the ARCW housing program is to assure that no HIV patient is homeless. Patients with stable housing are better able to adhere to medication regimens and achieve treatment success.
Thank You!
